

EQUIPMENT TAMPERING

Recently on a Class 1 rail service provider, an employee discovered that a brake wheel had been tampered with, putting employee safety at risk. This act was intentional and could have caused serious injury.

BEFORE YOU USE ANY EQUIPMENT:

- Inspect all rail equipment and rolling stock
- DO NOT OPERATE if you see signs of tampering or damage
- Secure the area and report immediately to:
 - Your immediate Supervisor or the person(s) responsible for railway operations and,
 - The Rail Service Provider at your site

YOUR SAFETY MATTERS:

- Always stay alert and aware of your surroundings
- Trust your instincts — if it feels wrong, don't proceed
- Prompt reporting helps protect everyone on site

 **Stay safe. Stay smart. Report all suspicious activity.**
